

Exolon® UV AdLight

Solid polycarbonate sheet for Signs

Your benefits:

- high light diffusion in combination with high light transmission
- extreme impact strength
- good fire rating

Solid **Exolon® UV AdLight** sheets are polycarbonate diffuser sheets for backlit signage applications. **Exolon® UV AdLight** combines high light diffusing properties with good light transmission, as required in state-of-the-art sign projects based on LED technology. They offer extreme impact strength that exceeds the physical properties of other products of their class. **Exolon®** sheets resist temperature ranges of -100 to +120°C and have a good fire rating.

Exolon® UV AdLight is available with a matt finish on one side and a glossy finish on the other side, both with improved weatherability, so that either side can be used, depending on the required finish. It has a bright appearance, also when it is not backlit. When illuminated, it will transmit the light practically unchanged, yet provide a uniform light spreading.

Applications:

Typical applications for **Exolon® UV AdLight** include all types of illuminated signs such as fascia signs, channel letters, totems and logos. It can be used for displays and other applications which incorporate lighting.

Your benefits:

Exolon® UV AdLight minimizes breakage losses, eliminates LED hot spots and allows for optimum design freedom.

Solid polycarbonate sheet for Signs

Ideas, innovative, intelligent, interesting... Exolon Group i-line represents the next generation of quality products. This seal guarantees innovative and intelligent first-class solutions at all times for a multitude of requirements.

Light Transmission:

Test Method according to CIE 130-1998, on a spherical photometer with a diameter of 1.5 m. Please ask us for more information. The stated values are typical values only.

Sample Thickness (mm)	2	3	4	5
Light Transmission τ_{D65}	61	59	55	51

Light diffusion:

According to DIN 5036-3 with a swivel-arm device using a luminance meter of class L (Fa. LMT) and a illuminance meter of class A (Fa. Czibula & Grundmann GmbH). The stated values are typical values only.

Sample Thickness (mm)	3	4	5
Half-power angle $ \gamma $	77°	77°	78°
Light diffusion factor $ \sigma $	0.86	0.89	0.90

Dimensions:

Thicknesses: **Exolon® UV AdLight** is available in 2 - 5 mm

Sizes: **Exolon® UV AdLight** is available in 2,050 x 3,050 mm

Permanent Service Temperature:

The permanent service temperature without load is approx. 120 °C.

Fire Rating*:

Country	Standard	Rating	Thickness
Europe	EN 13501-1	B-s2-d0	2 - 5 mm
USA	UL 94	HB	2 - 5 mm

*Fire certificates are limited in time and scope, always check if the mentioned certificate is valid for the purchased polycarbonate sheet type at the date of delivery.

Glow Wire Flammability Tests:

Glow Wire Flammability Index (GWFI): 2.0 mm: 850°C

Glow Wire Ignition Test (GWIT): 3.0 - 5.0 mm: 960°C
